

ABOUT ME

As an undergraduate pursuing a computer science degree, I bring a dynamic and passionate approach to software engineering. My energy, enthusiasm, and strong collaborative abilities make me a valuable team member. I am on the lookout for an exciting and challenging software engineering internship to propel my career development.

PROJECTS

● FitZen ([Github](#))

Fitness Management System - Third Year Group Project - Ongoing Project

Elevating fitness management at High Octane Fitness Center, Havelock. Key features of the system include membership management, personalized workouts, meal plans, progress tracking, real-time chat, and video conferencing.

Tech Stack: React.js, Material UI, Node.js, Express.js, PostgreSQL

● StudentCare ([Github](#))

Student Management & Facilitating System - Second Year Group Project

This platform offers a student community, free counseling sessions using video calls, and convenient tools to find nearby food and utilities. Additionally, it includes an intuitive mobile app for tracking progress, managing study schedules, and setting reminders.

Tech Stack: HTML, CSS, JavaScript, PHP, MySQL, NodeJS, Java

● Task Tracker ([Github](#))

A simple task-tracking web application. This is developed as a self learning project.

Tech Stack: React.js, Mock backend

● DiceRush ([Github](#))

Simple dice rolling game which can play two players. The player who reaches first to the winning score wins the game.

Tech Stack: JavaScript, HTML, CSS
